VGA AND STEREO AUDIO MATRIX SWITCHERS

MVX 1616 VGA A

MVX 128 VGA A

MVX 88 VGA A

- Eight models in I/O sizes from 4x4 to 16x16
- Ultra-wideband performance
350 MHz to 500 MHz (-3 dB),
depending on model
- Computer-video inputs and outputs
on 15-pin HD connectors
- Balanced and unbalanced
audio outputs
- Audio input gain and attenuation
- Audio breakaway
- Global presets
- RS-232 serial control
- Compact, rack-mountable enclosure

The Extron MVX Series Matrix Switchers are designed to route most common high resolution computer-video signals with stereo audio. Available in I/O sizes from 4x4 to 16x16, the MVX Series offers wideband switching performance with the convenience of 15-pin HD connectors for all computer-video connections. MVX Series Matrix Switchers are ideal for applications such as conference rooms, classrooms, mobile and emergency operation centers, and video conference rooms.

DESCRIPTION

The Extron **MX Series** Matrix Switchers are designed to route VGA-UXGA computer-video signals with stereo audio. Available in I/O sizes from 4x4 to 16x16, including a new 12x12 size, the MX Series offers wideband switching performance with the convenience of 15-pin HD connectors for all computer-video connections. MX Series models from 4x4 to 8x8 accept unbalanced stereo audio on 3.5 mm stereo mini jacks, while the 12x8 to 16x16 sizes accept either balanced or unbalanced stereo audio on captive screw connectors. All models output balanced or unbalanced stereo audio on captive screw connectors. Using pre-terminated cable assemblies, such as Extron's VGA with Audio Cables, eliminates crimping and makes installations faster and easier.

All MX Series models are equipped with a full range of control capabilities, including a standard QS-FPC™ - QuickSwitch Front Panel Controller, which provides a discrete button for each input and output, allowing for simple, intuitive operation. In addition, all models are equipped with RS-232 serial control utilizing Extron's SIS™ - Simple Instruction Set command protocol. They can be remotely controlled with the optional Extron MKP 2000 or MKP 3000 X-Y remote control panels, or via a third party control system. An optional handheld IR remote control is also available for 4x4 to 8x8 models.

FEATURES

- **Ultra-wideband performance – 350 MHz to 500 MHz (-3 dB), depending on model** – MX Series models in I/O sizes from 4x4 to 12x8 provide a minimum of 350 MHz (-3 dB) RGB video bandwidth, fully loaded. Larger sizes, from 12x12 to 16x16, provide a minimum of 500 MHz (-3 dB) at full performance capability, when one input drives all outputs.
- **Compatible with RGBHV, RGBS, RGSB, and HDTV component video**
- **Audio breakaway** – Provides the capability to break an audio signal away from its corresponding video signal, allowing the audio channels to be operated as a separate matrix switcher.
- **View I/O mode** – Allows users to easily view which individual inputs and outputs are actively connected.
- **QS-FPC - QuickSwitch Front Panel Controller** – Provides a discrete button for each input and output, allowing for simple, intuitive operation.
- **Global presets** – Individual I/O configurations may be saved and recalled either from the QuickSwitch front panel or through the serial controls. This time-saving feature allows you to set up I/O configurations and keep them in memory for future use.
- **Front panel security lockout** – Ideal for unsecured environments, this feature locks out all front panel functions; however, these same functions are available through RS-232 serial control.
- **RS-232 control port** – Using serial commands, the MX Series can be controlled and configured via the included Windows®-based control software, or integrated into third-party control systems. Extron products use the SIS - Simple Instruction Set command protocol, a set of basic ASCII code commands that allow for quick and easy programming. The RS-232 port also makes it easy to install firmware updates.

FEATURES (Cont.)

- **Rack mountable** – All models are housed in metal, rack-mountable enclosures.
- **Optional remote control panels and keypads** – Provide the flexibility to control a MX Series matrix switcher from a remote location.
- **Internal international power supply** – The 100-240VAC, 50/60 Hz, autoswitchable, internal power supply provides worldwide power compatibility.

UNIQUE FEATURES FOR 4X4 TO 8X8 MODELS

- **Switchable audio output levels** – Output levels can be switched between +4 dBu professional and -10 dBv consumer levels, allowing a mix of professional- and consumer-level audio equipment.
- **Unbalanced stereo audio** – Accepts unbalanced PC audio on convenient 3.5 mm mini stereo jacks. Audio output is buffered and can be output as a balanced or unbalanced signal.
- **Triple Action Switching™ RGB Delay** – Blanks the screen when switching to a new source. The new sync signals precede the RGB signals, so there is no glitch shown during the transition. The time delay between the RGB and sync signals is adjustable up to five seconds.
- **Includes removable rack ears**
- **Optional IR 501 handheld IR remote control** – Provides remote control from up to 30 feet (9 meters) away.

UNIQUE FEATURES FOR 12X8 TO 16X16 MODELS

- **ADSP™ - Advanced Digital Sync Processing** – An exclusive, all-digital process that regenerates the sync signal waveform and restores incoming sync level to 5.0 V p-p specifications. This ensures a stable image for improved signal compatibility with any LCD, DLP, plasma, or other digital display device.
- **Front panel I/O label windows** – I/O buttons may be labeled with names, alphanumeric characters, or bitmap icons for easy and intuitive input and output selection.
- **Balanced and unbalanced stereo audio** – Accepts both balanced and unbalanced stereo audio signals on captive screw connectors.
- **Audio output volume control** – Can be set dynamically for each channel through the front panel or serial control, eliminating the need for audio preamplifiers in many system designs.

AUDIO OUTPUT

Nominal level (output volume range)	
44-88 models.....	+4 dBu (1.23 V) (default) balanced (pro), or -10 dBV (316 mV) unbalanced (consumer), selectable
128-1616 models.....	0 to 64 (-75.8 dB to 0 dB) in 1 dB increments
Maximum level (Hi-Z)	
44-88 models.....	>+22 dBu, balanced; >+14 dBV, unbalanced at 1% THD+N
128-1616 models.....	>+21 dBu, balanced or unbalanced, at 0.1% THD+N
Maximum level (600 ohm)	
44-88 models.....	>+20 dBu, balanced; >+12 dBV unbalanced at 1% THD+N at default settings
128-1616 models.....	>+15 dBm, balanced or unbalanced, at 0.1% THD+N at default settings

CONTROL/REMOTE — SWITCHER

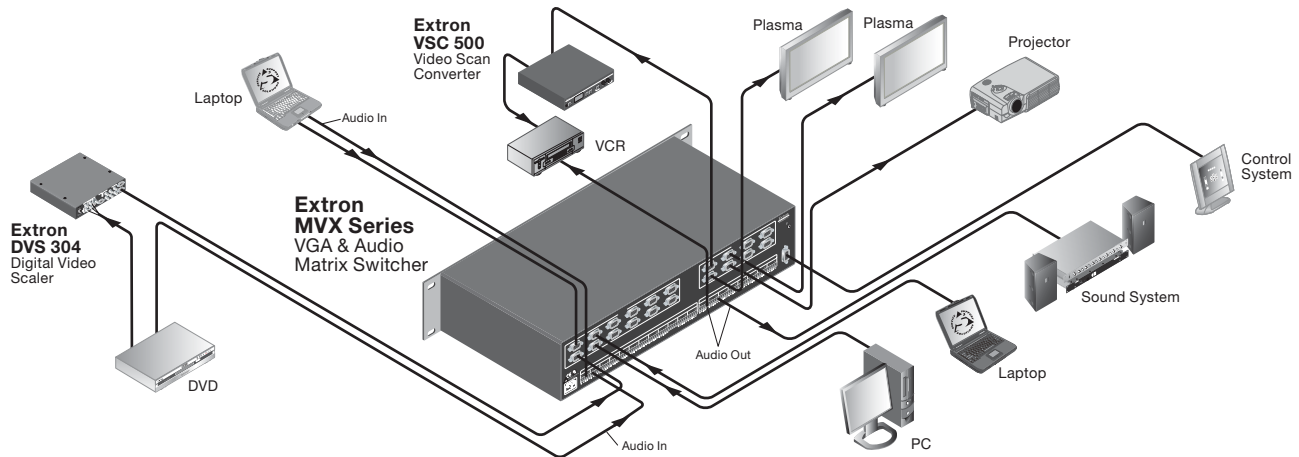

Serial control port	
44-88 models.....	1 RS-232, 9-pin female D connector
128 model	1 RS-232 or RS-422, 9-pin female D connector
1212-1616 models.....	1 bidirectional RS-232 or RS-422, rear panel 9-pin female D connector 1 bidirectional RS-232, front panel 2.5 mm mini stereo jack
Baud rate and protocol	
44-88 models.....	9600, 8-bit, 1 stop bit, no parity
128-1616 models.....	9600 (default), 19200, 38400, 115200 baud (adjustable); 8 data bits, 1 stop bit, no parity
IR controller module	
44-88 models.....	IR 501 (optional)
Program control.....	Extron's control/configuration program for Windows® Extron's Simple Instruction Set (SIS™)
